

TRAFFIC & PARKING CONTROL CO., INC.

MB32x72 JSS

Portable plastic barricade that is ideal for perimeter delineation, crowd control, construction sites and parking areas.

This portable plastic barricade is ideal for perimeter delineation, crowd control, construction sites, and parking areas. Extremely durable - once they are positioned, barricades are very difficult to move. The MB 32x72 JSS is lighter and more easily deployed than concrete road barriers. Typical deployments include security, ACP (Access Control Points), traffic control approaches, stand-off zones, perimeter / boundary lines, and hazardous material spills. These barriers can be set up to create an interconnected wall with no gaps. Available in OSHA approved colors. Stanchions can be utilized with snow fencing or chain link to create a secure zone.

COLORS:

Safety Orange

COMPOSITION:

LLDPE Linear Low-Density Polyethylene

SIZE:

Height: 32" / 30.5 cm

Length: 72" / 30.5 cm
