

SQ4[®] System

PORTABLE TRAFFIC SIGNAL SYSTEMS

EMERGENCY INTERSECTION CONTROL PORTABLE TRAFFIC SIGNAL

The SQ4 Portable Traffic Signal System has been specifically designed as quick response equipment for emergency intersection control resulting from loss of power or infrastructure. A compact footprint and reflective delineation facilitate the placement of the SQ4 in the center of the intersection for safe and effective operation. The SQ4 System is capable of providing continuous run time in excess of 14 days without charging. Deployment heights of 10 - 14 ft. enhance visibility and software based operating system conforms to NEMA performance standards. With appropriate add-on components the SQ4 can be converted to our popular SQ2T portable traffic signal for use in typical work zone traffic control applications.

SQ4® System

SPECIFICATIONS

Trailers per System	1
Signal Heads per Trailer	4
Signal Lamp Type	8" (200 mm) diameter LED
Power Source	12V / (8) 6V batteries
Solar Panel Wattage	110 W
Height: Operating Position	10 - 14' (3 - 4 m)
Trailer Weight	1000 lb. (450 kg)

SQ4 SYSTEM FEATURES

- Can easily convert to SQ2T® System
- Full matrix operating system
- Integrated conflict monitoring
- Manual & fixed time operation modes
- Wireless handheld remote
- Solar charging system
- Left turn arrows
- Fast efficient deployment & relocation
